

AFRICAN SUMAC

Rhus lancea

19

AFRICAN SUMAC

Rhus lancea

19

Scientific Name: *Rhus lancea*

Common Name: African Sumac

Size: 20-30' tall x 20-35' wide

Deciduous / Evergreen: Evergreen

Leaves / Flowers: Dark green willow like leaves. Whitish green flowers on female plants only.

Exposure: Full sun

Water: Little to moderate water

Origin: South Africa

Sunset Zones: 8, 9, 12-24

Maintenance: Prune to shape and prune out sucker growth.

Comments: Can be trained as a multi-trunked or single-trunked specimen. Older trunks exhibit fissures of a reddish hue and are extremely attractive.
