

FIREWHEEL

Stenocarpus sinuatus

42

FIREWHEEL

Stenocarpus sinuatus

42

Scientific Name: *Stenocarpus sinuatus*

Common Name: Firewheel

Size: 30' tall x 15' wide

Deciduous / Evergreen: Evergreen

Leaves / Flowers: Shiny deep green leaves. Scarlet and yellow flowers in fall.

Exposure: Full sun

Water: Moderate to regular water

Origin: Australia

Sunset Zones: 16, 17, 20-24

Maintenance: Relatively low maintenance. Prune as a young tree for strong structural branching form. Use a layer of mulch around the root zone and fertilize in the spring with slow release fertilizer.

Comments: Interesting and beautiful flowers. Can be used near pools.
