Landscape Water Management Classes for Professionals

This course will consist of four consecutive classes in landscape water management, each building upon the principles presented in the prior class. Each participant will receive a reference handbook and a certificate of completion at the end of the course listing all classes completed.

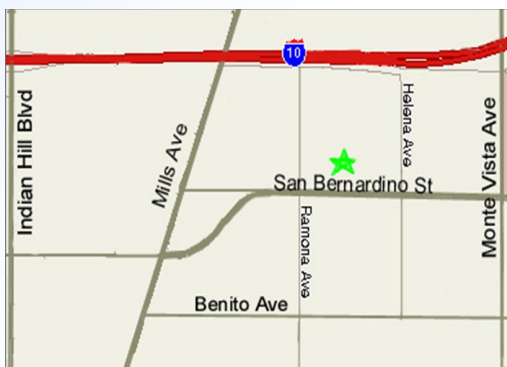

- (1) Irrigation Principles and System Adjustment and Repair:** Topics include types of irrigation systems, sprinkler layout, sprinkler components, sprinkler selection and spacing, and common sprinkler problems.
- (2) Irrigation System Troubleshooting:** Solving irrigation system failures due to mechanical, hydraulic, or electrical problems.
- (3) Controller Programming:** Hands-on experience using irrigation controllers.
- (4) Irrigation Scheduling:** When to irrigate and how much water to apply.
